### Glass Door Kit - GDK

All Chant pull handles can be mounted onto glass doors, specify 'GDK' if required.

They can be fitted as back to back pairs, or single handles surface fixed or back fixed.

Pairs of handles will be supplied with nylon washers or plastic tape attached to the pillar as part of a glass door kit.

Back fixed handles will be supplied as above on the handle side but also require the use of flat screws or dome nuts (as per pictures) for the internal side.

Hole size and location vary from handle to handle so refer to handle specification drawings.

GDK includes: Nylon washers / plastic adhesive tape, plastic sleeves and if required metal washers (colour matched).
