

CL400[®] ADA Magnetic

CL400 ADA Passage in satin chrome finish.

CaviLock CL400 ADA Privacy in satin chrome finish.

 **CaviLock[®]**

The CL400 ADA Magnetic matches the look and functionality of the CL400 Magnetic range with greater accessibility.

Utilising the patented magnetic mechanism of the CL400 Magnetic, this addition to the range provides flexibility for building owners. It uses the same door cutout and striker and is able to be retrofitted over existing CL400 flush handles for the requirements of disabled tenants.

Dimensions

Configurations

* To comply with NZS4121:2001 the offset handle option must be used. The centre of the handle should be positioned between 900mm and 1200mm (1000mm optimal) above finished floor level. The door needs to be at least 910mm wide (Aust. 1050mm) to allow minimum clear walk through of 760mm (Aust. 850mm). There must be a 45mm clear space from edge of pull handle to the nearest door jamb when the door is both fully open and completely closed. A flat closing jamb is recommended. The supplied 'Down to Lock' label must be positioned as close as possible to the handle. Consult local standards for guidelines relating to the specific project.
