“The door handle
is the handshake
of the building”

Juha Pallasmaa
Finnish architect, educator & writer

Bespoke liquid metal overlay

Felice Carlino

As an interior designer of long standing, with a reputation for design resolution, Felice Carlino was searching for a full-timber door pull for an accommodation pod he was designing.

"Everything I found was a combination of timber and metal, which didn't fulfil the brief visually and neither did they feel comfortable in the hand".

As a result he decided to design his own.

His research led to the design of a handle that intuitively responds to the mechanical workings of the fingers and hands. "Fingers are made up of three joints that wrap themselves around the grip," Carlino explains, "So we crafted a taper and radius edges so the door pull and lever would sit, easily and comfortably, in the grip of the hand - whatever the hand size."

Prototyping and development led to a product that he was finally happy to put into small local production in Australia, and then expand. The range now includes pull handles, lever handles, universal design lever handles and towel rails as well as custom finishes that take the product to a bespoke level.

"In a complex world sometimes a simple act, an engagement through touch and the reassurance of contact with a solid natural material, carefully crafted and finished, is one of life's small but significant pleasures."

Felice Carlino

The new Qantas Chairman's Lounge in Brisbane is a masterpiece, a showcase of the best of Australian design.

TIRAR was appointed to provide the bespoke, solid timber door furniture, designing a selection of elegant levers and door pulls crafted from fine Australian and imported wood.

They create a stunning first impression and hint at the luxury awaiting those fortunate enough to be invited in.

Wood panelling and marble are key features of the Lounge and the exquisite Tirar door furniture is perfectly at home in the refined environment.

The TIRAR range of door pulls, door levers, coat hooks, cabinet pulls, and cupboard handles can be created in a range of exotic timbers to complement and enhance any special project you have planned.

Door pulls available in 1200mm, 900mm and 600mm

Standard and Universal Levers

Architectural Door Pulls

1200mm Ingrain range - sandblasted American White Oak
with liquid metal overlay.

Architectural Door Pulls

It's about making an entrance. Not just a thing of beauty to be observed, the elegant and elongated form is a statement door pull designed to be comfortable to hold and one you'll want to caress.

The range is unique in its consideration of function, form and tactile delight, crafted to bring subtle warmth to a building in both a visual and sensory way.

Available in a range of three sizes, 600mm, 900mm and 1200mm and three handsome wood finishes.

Architectural door pulls come in three standard timber finishes and be customised in a range of exotic timbers to complement and enhance any special project requirements.

Timber is carefully sourced and certified from suppliers.

Sealed in marine grade spar and finished with a grade clear top coat satin finish.

Bespoke liquid metal overlays and finishes are also available, see page 30.

In the absence of a door rose, there's nothing to detract from the beauty and quality of the timber.

American Walnut

Standard Levers

Ergonomics is at the heart of TIRAR door furniture; the door levers have been designed to comfortably fit the grip of your hand.

The softness of the radius edges are designed to accommodate the largest and smallest hands. The sensuous feel of the timber is as important as the more functional aspects.

Levers come in three standard timber finishes and be created in a range of special project requirements.

Timber is carefully selected and sourced from certified timber suppliers.

Sealed in marine grade spar and clear top coat satin finish.

Universal Lever American Walnut

American White Oak

Cuña Cabinetry Door Pulls

Timber cabinet door pulls, inspired by the straightforward appeal of the wedge; and so named (cuña is wedge in Spanish).

Masculine, yet elegant, the range is unique in its consideration of function, form and tactile delight, crafted to bring subtle warmth to a building in both a visual and sensory way.

Bespoke liquid metal overlays and 3D printed textures are also available, see page 30.

Additional timber finishes

Australian Spotted Gum

The Cuña range comes in three standard timber finishes but can be ordered in a range of exotic timbers to complement and enhance any special project requirements.

Timber is carefully selected and sourced from certified timber suppliers.

Sealed in marine grade clear top coat satin finish.

American White Oak

American Walnut

Tutti Range

Uncomplicated and classic, the Tutti range is designed to be used as coat hooks, cabinet pulls, and cupboard handles.

A functional and handsome selection that elevate their utilitarian task.

Bespoke liquid metal overlays and 3D printed textures are also available, see page 30.

Additional timber finishes

Australian Spotted Gum

The Tutti range comes in two standard timber finishes but can be ordered in a range of exotic timbers to complement and enhance any special project requirements.

Timber is carefully selected and sourced from certified timber suppliers.

Sealed in marine grade clear top coat satin finish.

KORKKI

The perfect collaboration between functional and beautiful; a synthesis of arts in a simple form.

Executed in a selection of sustainable, solid timbers and natural stone, the organic lines flow smoothly around the perimeter of the design, seducing with its lustrous colour and tactile warmth. A classic shape, beautifully refined and detailed.

Korkki is a delightful, if not unexpected addition to the TIRAR range; unexpected in the sense that TIRAR designs will always express a sensuality that encourages interaction. KORKKI demands to be touched; the door furniture embraces the hand elegantly, the hooks invite you to drape a towel.

KORKKI Range

Uncomplicated and classic, the KORKKI range is designed to be used as door pulls, cabinet pulls, cupboard handles and coat or towel hooks.

A functional and handsome selection that elevate their utilitarian task.

KORKKI Door Pulls

It's about making an entrance. Not just a thing of beauty to be observed, the elegant and elongated form is a statement door pull designed to be comfortable to hold and one you'll want to caress.

Beauty of natural stone

Is anything so utilitarian that it
should be denied the opportunity
to be expressed in the allure
of natural stone?

We believe that beauty
and elegance are as
important as form
and function.

Door architecture
furniture in stone feels
luxuriously smooth
in the hand and invokes
a re-assuring honesty
that only natural
materials can.

Mela Stone Cabinet Pulls

A contemporary take on an ageless design in stone. The classic lines have been reinterpreted to accommodate the unexpected new material.

The result is sensual and elegant; but is a handle designed for a cupboard door deserving of such attention?

Calcutta Marble

Fontainebleau Stone

Available in two sizes, 180mm and 230mm, and two finishes.

Bespoke stone finishes available on request and suitability.

40mm

35mm

180mm and 230mm

Cassette Cabinetry Pulls in Solid Stone

The austere beauty of the exquisitely crafted Fontainebleau stone finish adds another dimension to the design. A new level of sophistication for the discerning.

The range comes in three lengths: 150mm, 200mm, 300mm.

Bespoke stone finishes available on request and suitability.

Towel Rails in
Solid Stone

Calcutta Marble

Fontainbleu Stone

Towel Rails in Solid Stone

Carved from the finest calacatta marble, a richly veined and eye catching centrepiece in the bathroom.

Or allow the sophisticated and reserved Fontainbleu stone finish to be discovered by the curious. The sensual curves of the design create an envelope in which to showcase the finest bath linen.

Bespoke stone finishes available on request and suitability.

Tutti Stone Range

Simple, beautifully designed and useful, these hooks, cabinet pulls and cupboard handles in natural stone defy their utilitarian purpose.

Carved from richly veined Calacatta marble, or available in Fontainbleu stone finish, the ample curves of the design are minimal yet more than enough to deliver a functional and handsome selection that elevate their task.

Bespoke stone finishes available on request and suitability.

Calacatta Marble

Fontainbleu Stone

Bespoke timber and stone finishes

The entire range of Tirar stone door furniture can be customised with Axolotl finishes, allowing for greater freedom of expression.

Timberlink Axolotl finish

TIMBERLINK AXOLOTL FINISH

A fusion of Axolotl metals applied as a custom design to the surface, or inlaid, into timber veneers or solid timber.

The possibilities are only limited by your imagination; almost any design can be incorporated into the timber.

STONE LINK AXOLOTL FINISH

A beautifully blend of natural stone with inlaid stainless steel, brass or resin offering unique beauty; custom designs individualise each stone piece, or create an entirely unique design of your own.

BESPOKE 3D PRINTED PATTERNS

Bespoke 3D printed patterns encompassing intricate and multilayered embossed designs can be created with use of the Axolotl 3D printer. Choose from an existing selection or supply your own design.

Ingrain fuses the lustre of Axolotl Metal with the natural warmth and richness of wood. By bonding the timber with Axolotl Metal, the fine details of the grain can be read through, creating the appearance of timber cast in solid metal. The resulting robustness makes it suitable for internal and external applications across hospitality, commercial and residential projects.
