WINDSOR

Windsor Brass Ltd is pleased to present this catalogue which shows a selection of genuine high quality, predominantly solid brass, door furniture and accessories especially chosen to complement the high standard of architecture found in New Zealand homes and buildings.

Coming from a wide variety of international sources, and combined with our own manufacturing facility, this Windsor collection is in a class of its own for traditional quality, functional elegance and timeless design.

Established in 1984, Windsor Brass Ltd is a New Zealand company with the experience and expertise essential for providing the efficient, courteous service and prompt delivery that attracts and retains satisfied customers.

We invite you to peruse the range, make your choice and compare the difference.

Blue Magic

Brass

The high polish of Windsor Brass products is treated with a clear protective coating to provide durability. Brass, like sterling silver, will gradually tarnish and take on an antique appearance. Atmospheric conditions, caustic agents such as paints, or scratches from sharp objects may cause the protective coating to crack or peel causing spotting and discolorations. However, the beauty of the metal can be maintained by taking a few simple steps.

Initial care for brass requires only a quick rub with Windsor Wax Polish and light buffing with a soft cloth. You may prefer to do this weekly, especially in exterior, often used or damp environments. "Blue Magic" Metal Polish is a quick, effective way of restoring mildly tarnished brassware. If heavy discoloration occurs the finish can be restored by stripping the remaining lacquer and polishing regularly with "Blue Magic". Alternatively let it age naturally to an antique finish.

The beauty of solid brass is that it can always be restored to its original lustre.

Stainless Steel

To aid the longevity and appearance of quality Windsor stainless steel product we recommend that it is kept clean and a metal polish such as "Blue Magic" be applied periodically. Atmospheric conditions, salt deposits, acids, caustic agents, cement or dust on construction sites all have the potential to cause discolouration to the surface. If this occurs do not be concerned as usually this is not the stainless steel itself but particles clinging to its surface. The product can be revived by following the above maintenance procedure and repeating regularly. This small amount of routine care can only preserve the elegance of your Windsor stainless steel hardware.
