

# STANDARD STOCK FINISHES

The standard stock finishes range from the classic Brushed Nickel and Satin Chrome through to the trending Graphite Nickel and Matt Black. All stocked finishes offer a range of door and window accessories to complement your handle choice and have a coordinated look and feel throughout the home.

#### 1-2 Day Lead Time

1-2 day delivery time applies to standard stocked products. In the unlikely event of delays or out of stocks, extended lead times will occur.

#### Terms & Conditions

- > Products, specifications, finishes and lead times are subject to change without notice
- > Special finishes on products may vary from colour swatches shown
- > A minimum quantity or extra surcharge may apply for some finishes
- > Special order products are non-returnable
- > Please check lead times for special orders
- > Brass items can be supplied unlacquered (surcharge applies)

# SPECIAL FINISHES

This collection of bespoke finishes are created using a variety of metal treatments, then the finish is relieved back by hand by one of our specialist craftspeople. Some finishes are left in their natural state to age gracefully over time, this is our living finish range, others are coated with a resin lacquer to protect the colour and provide either a high gloss or matt finish, these are our lacquered finishes. Accessories and pull handles are batch processed for colour coordination.

- > Use MB where RLB is not available
- > To match MSB, use USB
- > When using AB, some accessories are Bronze
- > Use PVD to match PB where PB is not available
- > Please refer to specific product information for AB lead times. Some items have 1-2 days delivery times.

#### 14 Day Lead Time

14 days delivery time applies to non-stocked bronze and powdercoated products and made to order pull/ bar handles. Products and finishes in this category are non-returnable items. In the unlikely event of delays, extended lead times will occur.

# Insist on style and quality. Insist on Windsor.

Established in 1984 Windsor sought to go beyond what had already been mastered. What started as a vision, has today become a leading supplier in the New Zealand market as an award winning national architectural hardware company.

Our proven experience has led the Windsor name to be renowned for a commitment to continuous improvement enabling the company to remain progressive and stay ahead of market trends. But what always remains constant is our reputation for exceptional customer service and quality.

We are pleased to present in this catalogue innovative bespoke architectural hardware products that are elegant, functional, reliable and produced in a sustainable way.

Windsor's design approach follows three fundamental elements – feel, finish and function. The 'feel' correlates with the design, engineering and ergonomics of the handles; the 'finish' element is the visual aspect achieved at the intersection of colour, trends and natural patina, and the 'function' refers to the mechanism, installation and how it operates on the door.

We invite you to peruse the range, make your choice and compare the difference.

The NZ Made Artisan collection of pull handles are made from solid brass, machined in New Zealand by kiwi craftsmen then finished by hand.

Named after some of New Zealand's great walks, these handles will provide a vista for your front door or connecting rooms similar to towering trees in native landscapes.

These styles can also be custom made to any length up to 800mm for all finishes. For lengths above 800mm please enquire for available finish options.

Modella Privacy Set Matt Black

A diamond in the rough.

Sleek edges embellished with raw texture offer a sensory experience.

Simplicity and complexity unite in a harmonious fusion.

A natural evolution of industrial elegance.

#### Lumina

The juxtaposition of modern vs. timeworn makes for a layered and textured statement. Bold hues are saved for the small details with the diamond knurling embellishing.

#### Rose

8411 Lever Set - Knurled 8411D Dummy Lever - Knurled 8412 Passage Set - Knurled 8415 Privacy Set - Knurled 56mmØx6mm rose

Finishes:

#### Sona

This design employs flowing, curvilinear forms of the lever and a clean smooth barrel tailored to your hand. The strong angles of the perpendicular neck and straight horizontal lines contrast the radiused edges.

**ARLU INVISIBLE HINGES** 

#### **ARLU INVISIBLE HINGES & ACCESSORIES**

Taking minimalism and clean lines to a new level. The ARLU range of Invisible and Pivot Hinges offer new concealed opening and closing systems.

Pivot Hinges are mounted top and bottom to provide a swivel opening action on doors up to 150kg.

Invisible Hinges are completely unseen when the door is closed and an architecturally designed look when the door is open.

#### Invisible Hinges

#### **FEATURES AND BENEFITS**

- > Universal: for left and right-opening doors
- > 180° opening angle
- > "Easy-hook": installation and adjustment by one person
- > Open and shutting movement cycle tests (min. 200,000)

## Pivot Hinges

#### **FEATURES AND BENEFITS**

- > Easy installation
- > Opening angle in both directions up to 150° > Fixed settings at 90° in both directions
- > Free choice of rotating position (hinge point)
- > Child-friendly (easy to open)
- > Available for floor-to-ceiling-height doors

## Invisible Hinges

## Invisible PRO

**9810** XS-4 Min Door Thickness 28mm Up to 50kg doors

#### STOCKED FINISHES CARE & MAINTENANCE

#### **SPECIAL FINISHES CARE & MAINTENANCE**

#### Stocked Finishes

#### Stainless Steel

To aid the longevity and appearance of quality Windsor stainless steel products, we suggest cleaning the surface of your hardware periodically with a warm soapy lightly dampened cloth to remove any build-up of dust and grime that may cause corrosion and affect the integrity of the finish. Then simply dry thoroughly with a clean, soft cloth. Minimum of monthly cleaning of door handles is recommended for both finish preservation and general hygiene.

Atmospheric conditions, salt deposits, acids, caustic agents, cement or dust on construction sites all have the potential to cause discolouration to the surface.

If tea staining does occur, to restore your stainless steel product to its original condition, apply a small amount of stainless steel polish onto the cloth and rub the surface along the grain (we recommend 'Blue Magic' – available from Windsor). Rub the affected areas until they are clean and the rust is removed, then wipe off the polish with a with a clean cloth

Please avoid using a course material to re-brush the finish as this can create inconsistent lines on the product and affect the overall look.

#### All other stocked finishes

To protect your handles we suggest cleaning the surface of your hardware periodically with a warm soapy lightly dampened cloth to remove any build-up of dust and grime that may cause corrosion and affect the integrity of the finish. Then simply dry thoroughly with a clean, soft cloth. Minimum of monthly cleaning of door handles is recommended for both finish preservation and general hygiene.

If needed, a high-grade chrome polish may be used according to directions to clean and restore the original shine to the chrome finish (Chrome Plated only).

Atmospheric conditions, salt deposits, acids, caustic agents, cement or dust on construction sites all have the potential to cause discolouration to the surface.

Matt Satin Brass

matt finish.

through the added matt lacquer.

Please avoid using any metal polishes, abrasive cleaners, scorers or rough cloths that may damage or scratch the hardware and do not spray or immerse the hardware in liquid to clean.

An elegant brushed brass finish that emits a luminous glow

A timeless classic, this mirror finish coordinates well with

A matt silver finish where a plating process that is typically

applied to an aluminium material, is immersed in an electrolyte

Satin chrome is derived from a heavy chrome electroplate

that is brushed back to achieve a consistent and seamless

Stainless steel is a raw material finish, hard wearing and tends

to be more resistant to scratching and marking than other

finishes. The Windsor stainless steel colour is a consistent

brushed look commonly referred to as satin stainless steel

medium and a charge is applied to it so the finish will adhere to

modern depending on the lever style it is applied to.

many other fixtures in the home and can appear traditional or

#### Special Finishes

This range of handles is constructed from superior solid brass. Forged in Italy they arrive here at Windsor in their raw state to be processed and hand-finished by our in-house team of craftspeople. To create the different finishes, we use a variety of metal treatments, then the finish is relieved-back by hand, creating a series of natural patina finishes. Some finishes are left in their natural state to age over time, this is our living finish range, others are coated with a resin lacquer to protect the colour and provide either a high gloss or matt finish, these are our lacquered finishes. It is recommended that all painting or staining of the doors is completed prior to installation of the door handles.

#### Living Finishes

The living finishes will naturally patina over time with general use. As with all living and aging finishes, it is recommended to clean the surface periodically with a damp soapy cloth to remove any build up of dust and grime that may cause corrosion and affect the integrity of

Matt Brass and Unlacquered Brass finishes can be further protected by using the Windson wax polish occasionally, rubbing this lightly over the surface will provide a layer of protection for extended finish longevity.

Oil Rubbed Bronze and Roman Brass (including DRB) can both be preserved by gently applying a thin oil layer to the surface from time to time. Wipe a thin layer of olive oil (or similar) over the handle then with a clean cloth wipe again to remove any excess on the surface.

#### Lacquered Finishes

The finishes with a lacquer are recommended to be kept free of dust and grime to prevent any chance of these particles affecting the integrity of the lacquer and potentially causing breakdown or discolouration. We suggest these are wiped and cleaned periodically using a mild window cleaner and damp cloth. Gloss Lacquered finishes may get some light surface scratches appearing with normal wear and tear, for this we recommend using the Windsor wax polish occasionally, rubbing this lightly over the affected area to will provide a layer of protection for extended finish longevity.

#### **Brushed Nickel**

Nickel electroplating is made up of several layers of colour then brushed and finished with a gloss clearcoat to protect the finish. Applied to brass, stainless steel, zinc alloy and aluminium dependent on the item

than others.

#### Graphite Nickel

Graphite Nickel resembles tones similar to 'gunmetal' and offers a softer look than black whilst still adding texture and depth to a home.

#### Matt Black

Matt Black is a bold finish and resembles a deep midnight tone. The finish is applied with electroplating, with some items powdercoated to achieve matching finishes across the range.

#### Matt Chrome

Wındsor

> Care and maintenance

Stainless Steel Cleaning Kit

> Metal polish cream instructions

A softer sheen than Satin Chrome or Chrome Plated, Matt Chrome is an electroplated flat silver finish that offers a resemblance of Anodised Aluminium and is exclusive to the Galaxy range.

# Wax Polish

## Blue Magic Stainless Polish

5094 100gms

#### Threadlock

> Medium strength

> Suitable for approx. 20 arubscrews

#### Antique Bronze

A traditional bronze finish with shades of rich chocolate and protected with a gloss lacquer. Often used in heritage homes as complements natural wooden doors and windows.

A smoky charcoal finish that after bronzing is rubbed back by hand to achieve lighter caramel edges that radiate through like twilight adding depth to your colour palette.

#### Matt Antique Bronze

An earthy bronzed finish depicting the tones of a New Zealand forest floor and coated in a matt lacquer

#### Matt Brass

This finish softens any lever with its even monotone appearance, smoothly coating the handle and locked in by wax.

#### Natural Bronze

Warm autumn hues that bring through texture similar to stone. This unlacquered finish is left to patina naturally over time.

Oil Rubbed Bronze

This finish offers bronze tones varying from a dark truffle through to champagne by hand rubbing the hardware with oil to achieve the natural patina appearance.

#### **Polished Brass**

A timeless classic, this mirror finish coordinates well with many other fixtures in the home and can appear traditional or modern depending on the lever style it is applied to.

#### Roman Brass

A medium toned bronze finish that depicts shadows of dusk. It is rubbed back by hand and left to patina naturally over time.

#### **Rumbled Brass**

A traditional bronze finish with shades of rich chocolate and protected with a gloss lacquer. Often used in heritage homes as complements natural wooden doors and windows.

#### Satin Brass

An elegant brushed brass finish that emits a luminous glow through the added gloss lacquer.

#### Unlacquered Brass

A luxurious golden colour with the same distinctive honey look as Polished Brass but non-lacquered. This is brass in its raw and natural form.

## Unlacquered Satin Brass

This brushed brass finish is more subtle than its lacquered counterpart and offers a soft lustrous sheen that will age naturally.

#### Powdercoat

These products can be powdercoated in any color from the Dulux range

## Glossary

#### Backset

Distance from front edge of the door to the centre of the handle spindle hole.

#### Cylinder

A key barrel that is inserted through a mortice lock to drive the locking function. These can be keyed alike to have the same key throughout the house.

#### Desprung

Refers to a lock body or handle that has had the springing tension reduced or removed.

#### **Dummy Mount**

Small plate with a fixed spindle mounted to it to be used under a dummy handle to prevent it operating on the door.

#### Escutcheons

The housing or decorative plates that are mounted to a door around a cylinder or keyhole to cover up holes made in a door.

#### Grubscrew

Screw that tightens the handle to the spindle.

#### Lever

Refers to the handle part that you grip with your hand.

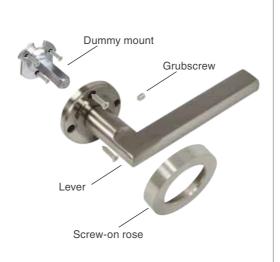

#### Mortice Lock

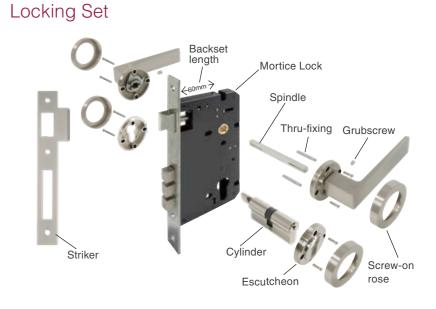

The lock body that is inserted into the door, includes both the locking and latching functions in one.

#### Handing for Single/Dummy Handles

## **Dummy Lever**

#### Rebate Kit

A packer and striker system used between double doors at the point where the latch connects.

#### Rose

Refers to the backplate part the handle mounts to. This encases the springs and point where the screws fix through.

#### Auxiliary Privacy Bolt

Refers to the privacy style where there is a separate turn and release set mounted above or below the handles on the door.

#### Spindle

The shaft that connects to each other through the door between the handles and drives the latch/lock mechanism.

#### Striker

Plate mounted in the door jamb that the door latch closes against.

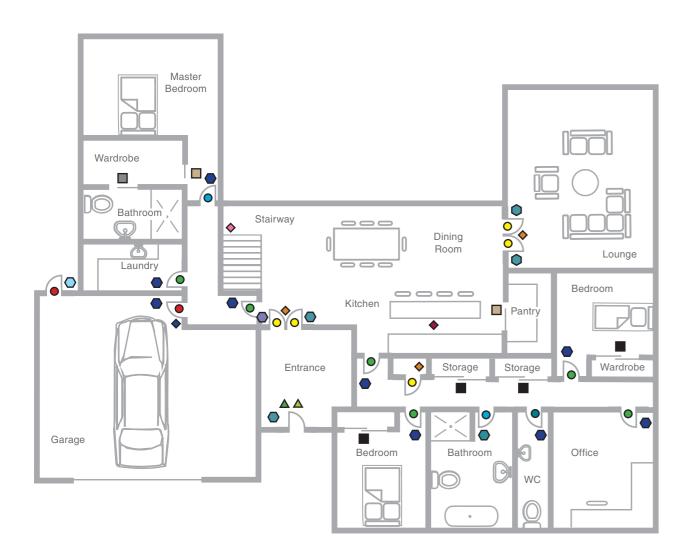

#### Thru-fixing

Screw fixing that bolt through the door binding the two handles together.

#### Tubular Latch

Refers to a tubular mechanism that is inserted in the door. This is the part that the handles operate to open and
