

Access Kit

Turn your smartphone into your key. The intuitive Yale Access app lets you manage the access of your home remotely.*

*When used in conjunction with a Yale Connect Wi-Fi Bridge

The Yale Access functionalities

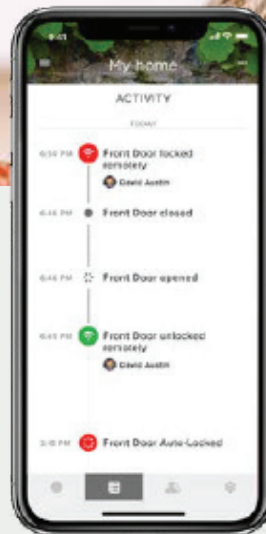

App control

Lock and unlock your door from your app, anywhere in the world.

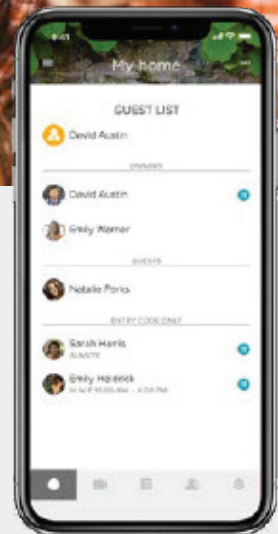

DoorSense™ technology

The lock will check the status of the door and tells you if your door is securely closed and locked.

Activity monitoring

See who comes and when with the Activity Feed. Check who unlocked the door and if or when it was actually opened. Set-up alerts to notify when specific people arrive home.

Guest access

Grant unlimited digital keys valid for a few weeks, a few hours, or a few minutes. Never worry about lost or stolen keys again. Access can be app access or code only sent via a text message.

Grant entry from wherever you are with the Yale Access app

Remote access means you can let in family, friends and trusted visitors like the cleaner or dog walker – from anywhere – when an Assure Lock is paired with Yale Connect Wi-Fi bridge. If someone forgets to lock when they leave, you can take care of it with the tap of a finger.

Expecting guests? Send a virtual key

You can send virtual guest keys to friends, family or people you trust from the Yale Access app. Guests can come and go as they wish – and you don't need to worry about lost keys.

Know the ins and outs of your home

The 24/7 activity feed will help you check who is coming and when – even when you're not there. You'll know when guests have arrived, what time your children got home, and whether a tradesman or cleaner was in to get the job done.

Auto-lock and unlock as you come and go

For peace of mind, the auto-lock feature can automatically lock your door when you leave for the day, either immediately after closing or after a set amount of time via the Yale Access app. When you return home and walk up to your door auto-unlock will then unlock it again thanks to geo-fencing, so you don't need to fumble around with keys.

DoorSense™: for peace of mind

DoorSense™ is a technology which will let you know whether your door is securely closed. And if anything unexpected happens, like the door being left ajar, you will be the first to know.

Use your voice to control your lock

Yale Access works with Apple HomeKit, Amazon Alexa and Google Home. You can control your lock with your voice using Siri, Alexa or Google Assistant.

Yale Connect Wi-Fi Bridge

For voice assistant functionality and remote access and control of your lock.

Keep your home secure

Check if your door is locked from anywhere

Monitor access from anywhere

Always know who is coming and when

Control who has access

Let visitors in and out when you aren't home

Enable voice assistant

Open sesame

Otherwise known as auto-unlock.

Auto-unlock is one of the most popular and unique features for Yale Access users. Having your door automatically unlock when you approach home, without needing to reach for a key or your phone is like having your own personal doorman.

Auto-unlock relies on a few different technologies in your phone to understand your location. That includes Bluetooth, WiFi, and GPS, in addition to the app. All of these systems are managed by your phone's operating system communicating with the app.

The app has two states that determine how auto-unlock works: Home and Away. When you're at home, your app will enter Home Mode and auto-unlock becomes inactive. As long as you are in Home Mode, your lock will not unlock automatically. As soon as you leave your home, the app will get ready to switch into Away Mode. Before switching into Away Mode, the Yale Access app waits for you to move at least 200 metres away from your home. Once the app is in Away Mode, your lock will wait to automatically unlock when you return home.

As you return to within 200 metres of your home, your phone will start looking for your lock. Within 5 metres of your door, the app will find your lock, automatically unlock the door, and return to Home Mode.

Yale Access Module

Turn your lock into a smart lock.

Manage lock settings

Manage your lock settings from your phone

Enables access from anywhere

The module allows Assure locks to work with the Yale Connect Wi-Fi Bridge (for away from home access and voice assistant compatibility)

Control who has access

The module also makes short term rental and cleaning or babysitting more accessible for you
